

PRACTICE FUSION EHR EXTENDED PROFILE

OVERVIEW

Practice Fusion is a cloud-based Electronic Health Records provider that focuses on creating integrative environments for treatment teams and care professionals.

Practice Fusion electronic medical records are built with medical professionals, service providers, analysts and patients in mind. The Practice Fusion app includes a patient portal so patients can easily access their PHR records to improve patient engagement.

Some of Practice Fusion EHR's core features available include charting, prescription management, electronic prescription transmission, medical billing, imaging and scanning integration among other clinical and service record maintenance and access features.

A Practice Fusion demo video is available through their profile, as well as Practice Fusion pricing.

DOES PRACTICE FUSION EMR HAVE AN APP?

The Practice Fusion app can be accessed via their mobile EHR system on Apple and Android devices.

SOFTWARE SCREENSHOTS

The screenshot displays the Practice Fusion EHR interface for a patient named Eric Ford. The top navigation bar includes the Practice Fusion logo, a search bar for help, and the user's name, Sarah Goode, San Francisco Health. The main navigation menu contains options like Home, Schedule, Charts, eRx, Messages, Labs, Documents, Reports, and Setup. Below this, there are tabs for Patients and Unsigned Charts, with the current patient, Eric Ford, selected. A sidebar on the left provides a detailed menu for the patient's chart, including sections for Basic, Insurance, Settings, Summary, PMH, Dx History, Rx List, Allergies, Adv Directives, Immunizations, Growth, Lifestyle, and Events. The main content area shows the patient's profile with a photo, name, gender, age, and date of birth. A 'Patient Actions' dropdown menu is visible, with a 'Start a chart note' button. Below the profile, there are tabs for various patient data points: Facesheet, Activity, Appointments, Referrals, eScripts, Messages, Labs, Documents, Billing, and Access History. The 'Facesheet' tab is active, displaying a list of diagnoses (5 of 32) and prescriptions (5 of 16). The diagnoses listed include Common cold (460), Other and unspecified hyperlipidemia (272.4), Dermatophytosis of nail (110.1), Acute bronchitis (466.0), and Diabetes mellitus, type I [Insulin dependent type] [IDDM] [juvenile type], not stated as uncontrolled (250.31). The prescriptions listed include Simvastatin 40 mg tablet, TriCor 54 mg tablet, TriCor 48 mg tablet, Advil 200 mg tablet, and Lisinopril 40 mg tablet. There is also a section for Drug Allergies, showing Advil (ibuprofen) oral tablet, and a PMH section, showing appenbectomy age 17. A 'Your Network' sidebar is visible on the right side of the interface.
