EHR IN PRACTICE

TEBRA EHR

EXTENDED PROFILE

tebra

OVERVIEW

Tebra is a cloud-based EHR and practice management solution for independent healthcare practices. The platform combines certified electronic health records, clinical documentation, electronic prescribing (including EPCS), lab ordering, telehealth, scheduling, billing and claims management, and patient engagement tools within a single system.

WHO IS TEBRA FOR?

Tebra is designed for private healthcare practices that want an all-in-one EHR and practice management platform without the complexity of enterprise systems.

The platform supports a wide range of specialties and enables practices to manage clinical documentation, scheduling, billing, and patient communication in one place.

As a cloud-based, browser-accessible system, Tebra runs on desktops and tablets with an internet connection and is designed to scale as practices grow.

DOES TEBRA HAVE A PATIENT PORTAL?

Yes, Tebra includes a fully integrated patient portal that allows patients to schedule appointments, complete digital intake, communicate securely with their care team, view health information, and make payments online.

The patient portal is built directly into the Tebra platform, helping practices improve communication and patient engagement without relying on separate third-party tools

FEATURE OVERVIEW

- ✔ Patient Demographics
- ✔ Patient Portal
- ✔ Scheduling
- ✔ Appointment Management
- ✔ Billing Management
- ✔ Medical Templates
- ✔ Document Management
- ✔ Clinical Workflow
- ✔ EM Coding
- ✔ Referrals
- ✔ Insurance and Claims
- ✔ Lab Integration
- ✔ Patient History
- ✔ Reporting and Analytics
- ✔ Voice Recognition
- ✔ Patient History / EMR
- ✔ e-Prescription
- ✔ E&M Coding
- ✔ Insurance & Claims
- ✔ Reporting / Analytics
