

PRAXIS EMR

EXTENDED PROFILE

OVERVIEW

Praxis EMR is designed to serve any size practice, from the solo practitioner to the enterprise hospital and ambulatory facility. Praxis EMR is unique in the industry as it claims to be the only EHR/EMR system in the United States that is designed without template use. The decision to not use templates has helped Praxis EMR to develop a functional EHR system in multiple environments due to its ability to be customized.

A significant part of the Praxis EMR is devoted to training on their EHR, billing and management systems. They offer on-site, digital resource and specialized training seminars for clients. There are additional educational opportunities for clients that are expanding their Praxis EMR systems as well.

Praxis EMR clients are provided with the functionality to manage patient care, use patient portals to increase engagement, perform practice management – which includes revenue cycle management as well as projection and performance analysis.

Praxis EMR is optimized for use with iPads in ambulatory environments and uses no third party components. Praxis EMR is also available as a Cloud-based solution, which can increase integration at points of care across multiple departments and locations.

FEATURE OVERVIEW

- ✓ Patient Demographics
- ✓ Patient Portal
- ✓ Appointment Management
- ✓ Document Management
- ✓ Clinical Workflow
- ✓ EM Coding
- ✓ Insurance and Claims
- ✓ Patient History
- ✓ Patient History / EMR
- ✓ e-Prescription
- ✓ E&M Coding
- ✓ Insurance & Claims

SOFTWARE SCREENSHOTS

The screenshot displays the PRAXIS software interface for a user named Clayton Reynolds, MD, in the Endocrinology department. The date is Oct 23, 2011. The interface includes a navigation menu on the left with sections for Settings, Patient Window, User Windows, and Scheduler. The main area shows a 'Vaccines' section with a list of vaccine names and a 'Clinic Vaccine' dialog box.

The 'Clinic Vaccine' dialog box is open, showing the following information:

- Name: PEDIARIX INJECTION
- NDC: 58160*81151
- CVX: N/A
- Type: Single
- VIS Date: [Empty]

Below the main fields is a 'Doses' section with a 'Dose' field (Unit: ml) and a 'Range' section (Days, 0 to 1). An 'Add dose' button is present. Below this is a 'List of Dosages' table, which is currently empty.

In the background, a table lists various vaccines with their NDC and CVX codes:

NDC	CVX
--	133
