

CARECLOUD CHARTS

EXTENDED PROFILE

OVERVIEW

CareCloud Charts is a Health IT solution that supports financial and clinical workflows in one platform. The system's architecture enables the development of custom apps through a developer-ready API so that practices can construct a solution that works for them

CareCloud Charts allows a high degree of both practitioner-specific and specialism-specific customization so that users get the benefit of a system tailored exactly to their needs. A range of extended functionality modules is available for practices to choose from, including telemedicine and Advanced Analytics - which provides a fast and flexible way to monitor and improve practices across the organization.

Elsewhere, CareCloud Charts offers revenue cycle management, a practice management module, a Meaningful-Use certified charting module to record patient information, and a patient engagement and social tool. This allows the physician to communicate with patients and work with peers to deliver the most effective medical practice.

CareCloud Charts is a cloud-based solution, so users can access the software on any device with a browser installed. A native clinical and admin iOS app allows secure access to patient data on the move. A range of implementation services is available from CareCloud, ranging from a basic 'essential' package to expert consultation and optimization.

SOFTWARE SCREENSHOTS

The screenshot displays the CareCloud software interface for a clinic. At the top, there is a navigation bar with the CareCloud logo and various icons for appointments, waitlist, and other functions. Below this is a header section showing the current date as Friday, June 16, 2017, and options to view appointments by status, visit type, day, week, or month.

The main area is a calendar grid for the month of June 2017, with columns for Dr. Derosa, Dr. Mulkey, Dr. Smith, and Dr. Hart. The grid shows appointments for Friday, June 16, 2017. The appointments are as follows:
