

ADVANCED EHR

EXTENDED PROFILE

OVERVIEW

AdvancedEHR provides functionality for medical practices as well as components designed for administrative and billing use.

For medical practices, AdvancedEHR provides a patient portal for admissions and check-ins alongside document management, e-prescriptions and more. All of this is available as a mobile platform on iOS devices.

Role-based access to AdvancedEHR for nurses and physicians improves workflow by limiting system complexity for each role. During the medical coding and billing phase, there are options to present the information for in-house coders or to integrate it with the API from an outsourced medical billing company.

The AdvancedEHR and revenue cycle management solutions are available to clients via a tiered subscription access program. AdvancedEHR carries an initial installation and training fee, and then clients may select “a-la-carte” options for their subscription package that are best suited to their practice.
