

QUANUM™ EHR (FORMERLY CARE360)

EXTENDED PROFILE

OVERVIEW

Quantum EHR, formerly Care360, is an ONC-certified cloud-based EHR technology used by practices across a wide range of specialties, including neurology, oncology, cardiology, and infectious diseases.

Quantum EHR helps small to medium-sized practices enhance quality, productivity, and patient outcomes by accessing and documenting important patient information anytime, anywhere. Quantum EHR has core EHR features including electronic lab management, ePrescribing, clinical messaging, clinical documentation tools and multi-system interoperability. Quantum EHR documents a full patient encounter, with clinical notes, observations and more.

Quantum EHR also provides mobile access across PCs, smartphones, and tablets. There is also access to a secure data exchange, which means that medics have access to a search engine of diagnosis and an e-referral facility.

By combining Quantum EHR with other Quantum Practice Solutions, including Practice Management and Revenue Cycle Management, you can benefit from a comprehensive suite of software solutions and services that can help improve clinical decisions, streamline practice management, and connect providers across care settings to support continuity of care strategies. With Quantum Practice Solutions, seamlessly connect every aspect of your patient and practice, from scheduling appointments, supporting clinical decisions, and documenting patient visits to verifying insurance, processing payments, and engaging patients.

WHAT IS CARE360 EHR?

Care360 is the previous name of Quantum EHR provided by Quest Diagnostics. Care360 practice management is still available under the new software, Quantum EHR.

DOES QUANUM EHR OFFER PRACTICE MANAGEMENT?

Quantum practice management is a feature of their EHR solution, this includes day-to-day practice tasks including revenue cycle management, medical billing, and appointment handling.
