## OVERVIEW

OncologyCloud is a modular health IT system, designed specifically for use by cancer care providers. The cloud-based system offers support for the entire clinical workflow and care delivery.

With interfaces to other systems, the OncoAnalytics module of the suite gives clinicians and administrators access to detailed clinical data as well as business intelligence. It provides those working in the life sciences and research fields to have the ability to quickly identify and contact potential clinical trial candidates. Whilst administrators can view easily-digestible data to understand patient demographics, costs, and fees. Billing discrepancies can be identified by OncologyCloud which analyses the complete lifecycle of a drug from administration through to charging and receipt. It will also analyze drug utilization patterns and variability in treatment choices allowing clinicians to suggest alternatives to patients.

The charging module - OncoBilling - captures all patient charges, generates insurance claims and can automatically post payment requests. It is interfaced with National Clearinghouse and Electronic Remittance Advice processing data.

SeeYourChart allows clinicians to grant their patients secure access to certain parts of the system, giving them views of clinical documents, lab results, appointments calendar and educational materials.

## FEATURE OVERVIEW

- ✓ Patient Demographics
- ✓ Patient Portal
- ✓ Appointment Management
- ✓ Billing Management
- ✓ Document Management
- ✓ Clinical Workflow
- ✓ Patient History
- ✓ Reporting and Analytics
- ✓ Patient History / EMR
- ✓ Reporting / Analytics
