

CENTRICITY EMR

EXTENDED PROFILE

OVERVIEW

Centricity is an EMR system from GE Healthcare, aimed at larger practices. Centricity combines clinical and financial management and is designed to be used on tablets and mobile devices, allowing physicians and practice staff to carry a patient's medical information and update them on the move. GE Healthcare developed Centricity so it can be integrated with a large number of medical devices and medical imaging systems.

Centricity EMR focuses on patient outcomes, with a series of reporting tools that allow a practice to compare itself with others both locally and nationally. This means that staff within practices that use Centricity EMR are able to actively participate in performance pay comparisons and assessments.

Within the solution, GE Centricity offers an e-prescribing functionality and a patient portal that allows patients to schedule appointments, access billing statements and view lab results. The system is integrated with the Medical Quality Improvement Consortium giving access to 20 million anonymized patients with diseases that are most regularly the subject of pay-for-performance reviews.

WHAT IS CENTRICITY SOFTWARE?

GE Centricity is an EHR (electronic health record) system with capabilities to support practices administratively and clinically. Centricity practice management enables physicians and administration to perform the day-to-day tasks involved in running a practice from scheduling appointments, billing, and follow-ups. Additionally, Centricity electronic medical records keep track of patient data which is also maintained using the Centricity patient portal.
