

**EXSCRIBE EHR**

**EXTENDED PROFILE**

## OVERVIEW

Exscribe is a specialist EHR solution for orthopedic practices of all sizes. The EHR is suitable for small practices through to large university-owned practices.

Exscribe EHR was developed with the guidance of a board of practicing orthopedic surgeons, administrators, and industry specialists. It offers a specialist alternative to multi-specialty EHR platforms, which can be too generic to fit the needs of orthopedic practices. The EHR software features an orthopedic-specific knowledge base and a one-click workflow that is designed around the needs of orthopedic practitioners.

Exscribe EHR also offers integration with other leading practice management and PACS solutions. It offers e-prescribing and a patient portal, which allows the patient to access health data easily without the need for medical paperwork. The EHR software also simplifies the appointment booking and billing process.

Available as a cloud-hosted system or as an on-premises installation, Exscribe EHR also comes with an iOS app for remote access. Exscribe offers telephone and online support for clients. This support is unlimited and comes with all software updates and upgrades included.
