**EXTENDED PROFILE**

## OVERVIEW

PulseEHR is designed for ambulatory surgical centers, multi-site practices, integrated delivery networks, and management services organizations of a range of sizes. The EHR can be set up to work with many specialties, including cardiology, family practice, nephrology, neurology, orthopedics, and urology.

Flexibility is a prominent feature of PulseEHR. The EHR can be deployed through the cloud or on-premise and is customizable to the needs of each individual provider. This means it can accommodate a wide range of workflows and clinician preferences within a single practice. PulseEHR is ONC certified and provides the features needed to qualify for government incentive programs.

The PulseEHR platform comes with e-prescribing and there is an easy-to-use patient portal. The clinical management dashboard is customizable and there is automated care and order management, point-of-care electronic charting, and an integrated document, fax, and transcription management tool. The EHR also offers claim scrubbing tools, to ensure clients get the best billing rates.

PulseEHR offers on-site training and implementation. There is also online support through a dedicated customer portal and live service support advisors are available on the telephone. PulseEHR users are provided with their own dedicated account manager.

## SOFTWARE SCREENSHOTS

The screenshot displays the PulseCloud software interface. At the top, the user is logged in as 'James Brown, Provider Full' at 'Kimo Family Practice'. A search bar is available for finding patients by name, chart#, or ID. The main section is titled 'Patients to be seen - 6' for 'Today - 11/15/2016' by 'James Brown'. A table lists the following patients and their visit details:
