

GEHRIMED

EXTENDED PROFILE

OVERVIEW

GEHRIMED is an ONC-certified electronic health record (EHR) platform specifically designed for long-term post-acute care (LTPAC) practitioners.

Originally developed by [Geriatric Practice Management](#) (GPM), it addresses the unique needs of healthcare providers operating in settings such as skilled nursing facilities, assisted living communities, and other long-term care environments. The platform aims to streamline clinical workflows, enhance patient care, and improve overall efficiency for practitioners in the LTPAC sector.

EVOLUTION OF THE PLATFORM

Since its inception, GEHRIMED has undergone continuous enhancements to meet the evolving needs of its users. The platform has integrated features such as mobile accessibility, customizable templates, and interoperability with other healthcare systems. These developments have positioned GEHRIMED as a leading solution in the LTPAC EHR market.

In February 2021, [Netsmart](#), a prominent provider of healthcare technology solutions, acquired GPM and its flagship product, GEHRIMED. This strategic acquisition aimed to enhance provider digitization and mobile workflows, further integrating GEHRIMED into Netsmart's CareFabric platform to deliver interoperable data sharing between long-term care facilities and the providers that treat and coordinate care for their residents.

SOFTWARE SPECIFICATION

OVERVIEW	
PRODUCT NAME	GEHRIMED
