

 EHR IN PRACTICE

**NEXTECH**

**EXTENDED PROFILE**

 Nextech

## OVERVIEW

Nextech is a comprehensive EHR and practice management software solution tailored to meet the needs of specialized medical practices. With over two decades of experience, Nextech provides robust tools to streamline workflows, enhance patient engagement, and optimize administrative processes.

Popular among practices in dermatology, plastic surgery, ophthalmology, orthopedics, and medspas, Nextech delivers specialty-focused solutions that cater to the unique requirements of these fields.

## SPECIALTY FOCUS

Nextech specializes in serving practices with unique requirements:

- **Dermatology:** Customizable templates, image management, and documentation tailored to dermatology workflows.
- **Plastic surgery:** Tools for managing aesthetic treatments, cosmetic consultations, and surgery scheduling.
- **Ophthalmology:** Ophthalmology-specific EHR features like image integration, diagnostic tools, and compliance tracking.
- **Orthopedics:** Comprehensive orthopedic EHR for managing surgeries, injury assessments, and therapy progress tracking.
- **Medspa:** Intuitive tools for managing aesthetic treatments and medspa-specific workflows.

## PRACTICE MANAGEMENT FEATURES

Nextech offers extensive practice management capabilities that support solo practices and multi-physician groups:

- **Patient demographics and history:** Easily accessible patient records and health histories.
- **Referrals:** Streamlined referral management for enhanced care coordination.
- **Multi-office support:** Scalable for practices operating across multiple locations.

## PATIENT ENGAGEMENT WITH TOUCHMD

[Nextech now integrates with TouchMD](#), a platform designed for the aesthetics industry. It helps providers manage the entire patient experience, from initial consultation and education to marketing and telehealth.

To further enhance this, TouchMD Snap Pro helps capture consistent, professional-grade facial photos. Its AI-powered technology guides the user to the right camera position and automatically detects patient faces, helping to document and showcase treatment outcomes.
