

SPRY EMR

EXTENDED PROFILE

□

OVERVIEW

SPRY is an AI-native EMR, integrated billing, and revenue cycle management platform built specifically for outpatient physical therapy (PT), occupational therapy (OT), and speech-language pathology (SLP) organizations, from independent clinics to large multi-location rehab groups.

Rather than adding AI as a standalone feature, SPRY embeds AI across clinical and revenue workflows. The platform connects digital intake, scheduling, documentation, patient engagement, eligibility verification, prior authorization,

billing and RCM, payments, analytics, and reporting in one system, replacing fragmented point solutions and giving clinical and revenue teams more time for higher-value work.

Key features:

- Clinical documentation: AI SOAP Scribe, specialty-specific templates and macros, eval/daily/progress/discharge notes, copy-forward, co-sign workflows, mobile companion app
- Practice management: online scheduling, waitlist management, digital intake, kiosk check-in, patient portal, appointment reminders, two-way SMS, copay collection
- Eligibility & Prior Authorization: real-time and automated overnight eligibility checks, AI-powered prior authorization, authorization tracking
- Billing & RCM: automated claim scrubbing, billing rules engine, coding and modifier checks, clearinghouse integration, ERA auto-posting, denial management, integrated payments, MIPS reporting
- Analytics: revenue, clinical, and therapist-level dashboards, claims and denial visibility, no-show insights
- Home Exercise Program powered by Wibbi

KEY DIFFERENTIATORS:

- AI-native, not AI add-on: AI runs across documentation, prior authorization, eligibility, fax/document processing, and billing workflows inside the platform.
- EMR + billing + managed RCM in one: organizations can use SPRY's software alone or add SPRY's billing and RCM services (credentialing, claims, denials and appeals, ERA posting).
- Built for outpatient rehab only: purpose-built for PT, OT, and SLP, including pediatrics, pelvic health, vestibular, neuro, hand therapy, and sports medicine.
- Low-disruption migration: structured data migration from existing EMRs, with weekend cutovers available for eligible migrations and dedicated implementation support
- Enterprise-grade compliance: HIPAA-compliant (BAA available), ONC certified, SOC 2 Type II, data encrypted in transit and at rest.
- Open integrations: APIs, webhooks, and SFTP, with integrations including Wibbi, Claim.MD, Stripe, Square, Twilio, Zocdoc, HubSpot, and Zapier.

CUSTOMER RESULTS

- First Rehabilitation: 37% revenue growth; cancellation rate cut from 17% to 7.5%
- Renew Physiotherapy: 95% reduction in authorization denials; 40% faster reimbursement
- Excel Therapy: claims submitted within 24 hours; 50–70% faster intake
